6x max 70W Classic A60 (E26)

o/or

6x max 30W CFL (E26)

o/or

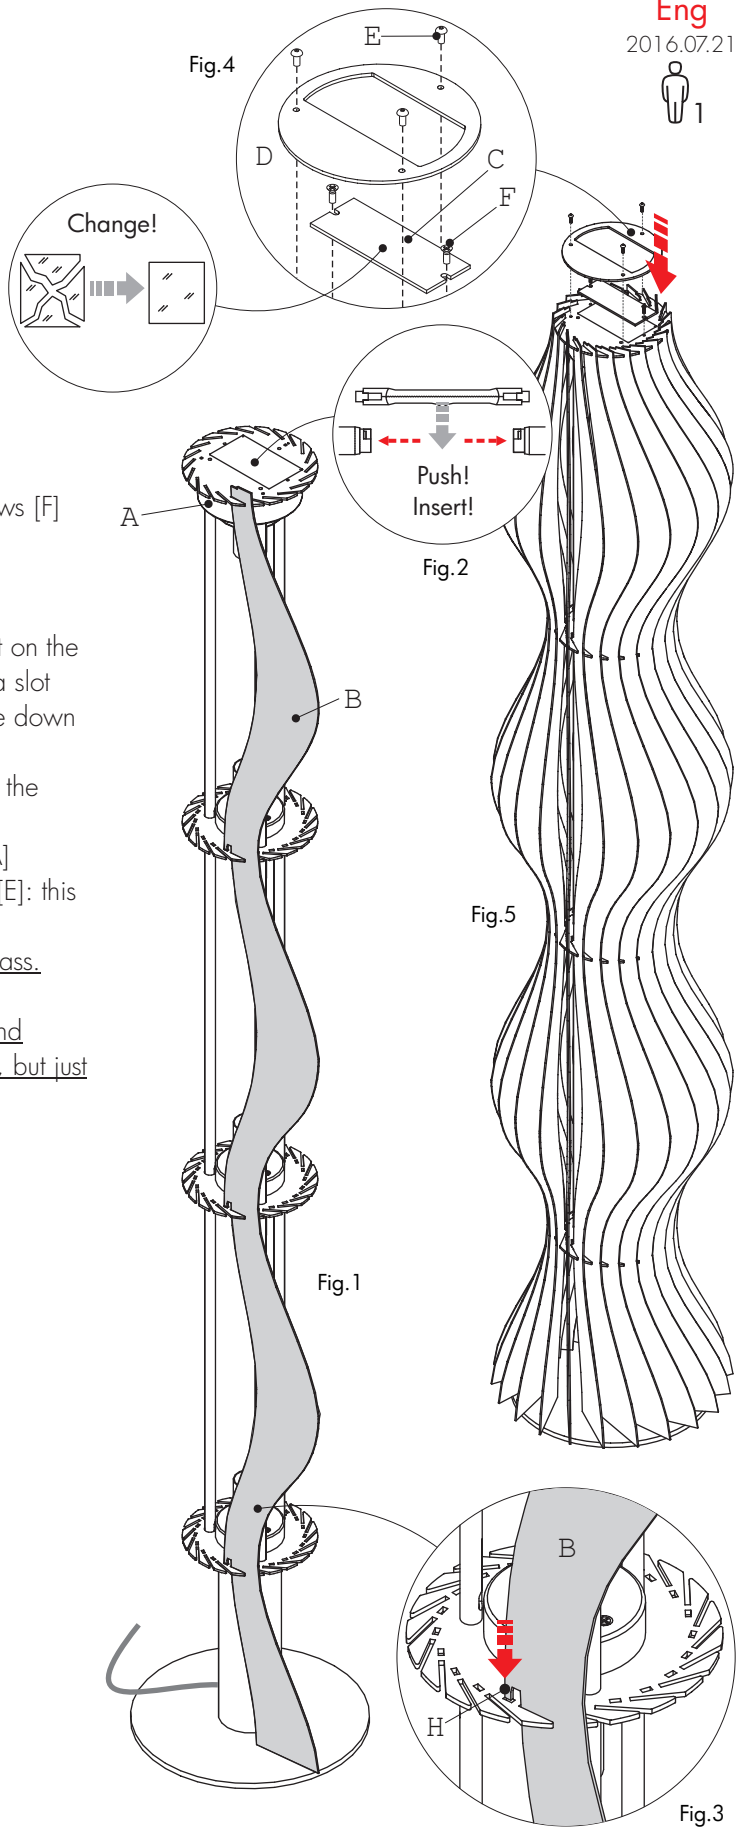

6x max Classic A60 LED (E26)

MOUNTING INSTRUCTIONS

- 1) Undo the screws [E] and remove the ring [D]. Then undo the screws [F] and remove the glass [C] (see Fig. 1 and Fig.4)
- 2) Install the light bulbs inside the frame and on top of it [A](Fig.2)
- 3) Place the glass [C] and block it with the screws [F](Fig.4)
- 4) Place the first "blade" [B] on the frame paying attention to insert it on the same slot on the various levels (see Fig. 1 and Fig.3); starting on a slot close to a vertical rod of the frame will make the task easier. Slide down the "blade" to insert the hooks [H] on the appropriate holes. Install the next "blade" using the first as a reference and so on for the remaining "blades".
- 5) Once all the "blades" are in place, close the top compartment [A] placing the ring [D] on top of the glass and fix it with the screws [E]: this way the "blades" will be secured (Fig.5)
Attention: Be careful not to over tighten to avoid damaging the glass.
- 6) Insert the plug.
Note: To replace a light bulb inside the central structure unlock and remove a few blades. It is not necessary to remove all the blades, but just enough to be able to access and replace the faulty light bulb.
