products in the market

NOSTALGIA STUDIO ITALIA DESIGN

Nostalgia offers retro shapes that blends modern lines, giving the rooms a chic and trendy atmosphere, perfectly in line with today's styles. Materials, used in this creation, characterise the influence of the Venetian context in which the company resides; careful and high-quality workmanship of the glass reflects the ancient tradition of glass in the soft and precious lines giving emotional appeal to the lamp. Three sizes and four different colours that give the possibility to create and play with lamps, creating a contact with the same and allowing customisation of the compositions.

A-TUBE

STUDIO ITALIA DESIGN

The look is more minimal and satisfies an organic and simple design using the efficiency of LED technology. With the new matte black finish, the design is always up to date and perfect, either alone or in small or large compositions in different heights.
